

THE YOLO DEMOCRAT.

CATCH THE SUNSHINE.
Catch the sunshine! That is the dream of every man, woman and child. It is the thing that makes life so sweet and so full of interest. It is the thing that makes the world so beautiful and so full of life. It is the thing that makes the sun shine so brightly and so gloriously. It is the thing that makes the flowers bloom so sweetly and so fragrantly. It is the thing that makes the birds sing so sweetly and so melodiously. It is the thing that makes the world so full of life and so full of joy. It is the thing that makes the sun shine so brightly and so gloriously. It is the thing that makes the flowers bloom so sweetly and so fragrantly. It is the thing that makes the birds sing so sweetly and so melodiously. It is the thing that makes the world so full of life and so full of joy.

Miscellaneous Items.
SALT LAKE is seven feet higher than it was ten years ago, and is constantly rising. Six thousand five hundred Cheyennes are being fed by the Government at the Cheyenne agency, and one thousand more are expected to apply for subsistence. The telegraph states that the Ways and Means Committee has recommended non-concurrence in the Senate resolution extending the income tax for the present year.

The test of Thomas Jefferson when selecting men for office was: "Is he capable? Is he honest? Is he faithful to the Constitution?" Grant inquires, "Do he give me anything?" The American Submarine Company of New York is fitting out a vessel for the purpose of recovering \$5,000,000 of treasure from the wreck of a Spanish ship which sunk in the Bay of Cumaná, Venezuela, 1819.

Congress recently voted the amount of a year's salary as Judge—\$6,000 to the widow of E. M. Stanton, for whom over \$150,000 has already been raised by subscription, in addition to \$72,000 life insurance policy, which he is said to have left her.

For the prevention of scarlet fever hang a bag of gum camphor about the necks of children, letting it rest on the breast next to the skin. For a child six months old and under, 1-3 of an oz.; from six months to five years, 1-2 oz.; and any age after that, 1 oz.

A lady in Michigan has recently recovered her reason after having been insane twenty-three years. The insanity has been a kind of melancholia, but she remembers vividly what occurred before it, and sadly puzzles her new friends by her stories of "what occurred a few weeks ago."

The tunnel through Mount Cenis is advancing at a rapid rate. The length of the galleries now open exceeds eleven thousand two hundred yards. Only fifteen hundred yards remain to be perforated, so that it may be reasonably expected that this gigantic undertaking will be terminated in the course of the present year.

Those who think our cultivated lands must grow poor as they grow old will find food for reflection in the fact that not many years back the average yield of wheat per acre in England was about ten bushels—it is now over thirty bushels. The result of better economy of home manure and the extensive use of imported fertilizers.

In a recent communication made by Florence Nightingale to the New York Prison Association, she suggests that jails be turned into workshops, so that criminals may pay for stolen property or damages, and for their own expenses. Want of employment in prison is bad—want of employment out of prison leads to crime. Miss Nightingale's suggestion is good.

EFFINGHAM LAWRENCE, of Louisiana, having used the steam plow for two years, concludes that it saves nearly one-half the labor in plowing, and, owing to the deeper working of the ground, the crop is nearly 50 per cent. better than on ground tilled in the ordinary way. He thinks steam plows will do much towards solving the labor question in the South.

A FIFESHIRED man recently took his child to the minister to be baptized, who asked him: "Are you prepared for so important and solemn an occasion?" "Prepared!" he echoed. "What indignation!" he said. "I have a flint of barnocks baked twice, a ham, a gallon of the best Highland whisky, and I wad just like to know what better preparation ye could expect for a man in my condition o' life?"

SENATOR HOWARD, of Michigan, let the cat out of the bag in the Georgia debate in the Senate on Monday. He said "he was satisfied a majority of the voters of Georgia are opposed to the Republican party." Therefore keep Georgia out; put the State under a Brigadier; or legislate the Radical Legislature into four years. This is what is called "guaranteeing a republican form of government."

In Morocco fat women are esteemed beautiful, and girls are accordingly regularly fattened for the imperial harem. They take a plump daint of thirteen or fourteen, and shut her up in a room, the windows of which are darkened with green silk. She is kept without exercise, and regularly crammed with confection, or moistened meal rolled into balls. If she objects to swallowing as much as is thought desirable, she is soundly beaten to give her an appetite.

In Florida there are many lakes which have holes in the bottom and underground communication, so that they will sometimes shrink away to a mere cupful, leaving many square miles of surface uncovered, and then again fill up from below and spread out over their former area. Some of them have outlets in the ocean far from shore, bursting up a perpetual spring of fresh water in the very midst of the briny saltiness of the sea. In times of low water, during a long, exhaustive dry season, men have gone underground in one of these subterranean rivers from lake to lake a distance of eight miles.

The Wilcox tannery, in Elk county, Pennsylvania, is said to be the largest in the world, though a similar establishment in Wilkes-Barre, Pa., claims the honor. It was built in 1862. The property of which it is a part, comprises 22,000 acres of land heavily covered with hemlock. The bark mills of the concern are in a building 45 by 100 feet, two stories high, and capable of grinding 75 cords of bark per day. These mills are driven by a 80-horse power engine, and the only fuel used is spent in tan. The leaching house is 38 by 210 feet, and two stories high. It contains 12 leaches of immense size. The sweat pit is 20 by 30 feet, of stone. Over 700 vats are now in use. The company makes nothing but sole leather, and of this the product is 120,000 sides per annum, though when the tannery is completed 200,000 sides will be turned out. The consumption of bark is 14,000 cords per year.

THE HOWE MACHINE CO.'S

SEWING MACHINES!

Paris Exposition Universelle, 1867,

TWO GRAND PRIZES.

Grand Cross of the Legion of Honor,

To ELIAS HOWE, Jr., as the inventor; and Gold Medal for the best Sewing Machine.

The Highest Honors Ever Conferred for Sewing Machines.

This Machine has long been regarded as the standard of excellence, and has become celebrated all over the world. The work done by these Machines is unsurpassed—sewing the finest, muslin or the thickest cloth, with equal facility; and requiring no extra adjusting for uneven thickness or passing over seams. It runs as smoothly as a clock, and it seems more like a thing of life than a machine moved by the will of the operator. It is capable of doing every description of sewing that is required in a family; and also for seamstresses and dressmakers. It will be found the most satisfactory Sewing Machine in use. Notwithstanding their great superiority, they are sold at prices as low as other first-class machines.

A Medal of Honors of Mr. Howe is embodied in the plates of every Howe Machine, without which none are genuine. Every purchaser of a Sewing Machine should inquire for ELIAS HOWE, JR.'S SEWING MACHINES, and if they are not sold in their retailing address the General Agent for Illustrated Circulars, etc., and do not purchase until you have thoroughly investigated these renowned machines.

ELIAS HOWE, General Agent, of the Howe Machine Co., 127 Kearny street, San Francisco.

FLORENCE

SEWING MACHINES!
The FLORENCE has now been used on the Pacific Coast seven years; its merits are known and its reputation established. It is here in daily use in more than six thousand homes, and is especially speaking for itself.

"Gold Tried in the Fire!"

Competition and opposition—fair and unfair, have not consumed or injured it. It stands the practical test upon a greater range of work than any other Family Sewing Machine in use.

If there is a Florence Machine within one thousand miles of San Francisco not giving entire satisfaction, if informed of it, I will attempt to it promptly, without expense of any kind to the owner.

Shoemakers, Tailors and Glove makers are invited to examine our New Florence Manufacturing Machine.

Descriptive Circulars and Samples of Sewing sent free on application.
